SmartBack

LUXY®

SmartBack

SmartBack is a collection of chairs designed for very intensive use for very demanding office environments. **SmartBack** is also available in the 24hrs version. The collection has been designed with high technology materials that represent the maximum comfort and resistance.

SmartBack

SmartBack is available with white or black backrest that always matches the same finish of lumbar support, bases, armrests and castors. It is also available with aluminium base. The backrest support is in fibreglass-reinforced polyamide always in black finish.

SmartBack

The harmony of shapes and the aesthetic linearity enhance the technicality, ergonomics and easiness of use of this collection. SmartBack creates well-being, tranquility and comfort that facilitates your daily work.

tecnologia flessibile

flexible technology
technologie flexible

The technical intelligence of SmartBack lies in its backrest in elastomerized polypropylene that follows the movements of the back of the user. The backrest works with a fiberglass-filled polyamide support and it has been designed to be breathable, hygienic and very comfortable.

configurations

The collection can be configured as a stool, chair without armrests with different types of armrests according to the function of use. SmartBack is available with different bases on castors or glides.

SmartBack 24 hrs

SmartBack in the 24hrs configuration is able to support highly intensive work with 24-hours use with the primary focus always in comfort.

The armrest has a steel core that allows an excursion of 150 mm in height; the pad is "soft touch" with 360° rotation (which allows the use of pad on two sides). Width adjustment of the armrests of 80 mm. The seat has an adjustment system that allows to work at 0°, -2,5° or -5° (negative).

The seat is adjustable in depth up to 60 mm. The mechanism syncro-tilt with 24° backrest oscillation 9° seat with 4 locking positions and anti-shock system. Backrest tension adjustment in 10 locks.

The colors of the leather and fabric present in our color-binder are to be considered indicative and approximative. The genuine leather and real leather are natural derivatives and therefore differences in grain, porosity or color compared to the skin are a further guarantee of the naturalness and uniqueness of the products purchased and thus represent an added value. Products made with Luxy quality materials will be unalterable and long-lasting. We reserve ourselves the right to make technical changes to our production keeping the use of the product itself.

Air Design

Air Design is a multidisciplinary study where design integrates its various skills and specialisations in order to achieve an innovative product or service. It has no preset boundaries; it goes as far as design does. The method lies in the perfect expression and integration of knowledge and design technologies that develop, evolve and resume so getting to innovative and non-replicable solutions. Air Design is a creative team sharing skills and professionalism, which gets contaminated by sharing different knowledge in the field of design while working together on one concept.
